

2017
GREETINGS &
Update

Team
Wishes you all

A Very Happy and Prosperous New Year 2016

"Big Thank You For Your Patronage"

Message from IVF centre 2016

No one can be victorious when standing alone it is a team effort . If we at Lifecare IVF have been able to bring joy in your lives , it is only because of your trust and support in each one of us.

We sincerely thank each of you for your belief and patronage.

In the last one year, we have upgraded our expertise in PGD/ PGS and made significant advances in the field of male infertility treatment , including stem cell therapy.

The inclusion of Sperm DNA fragmentation for evaluation of Sperm function test has helped us a lot find the cause of IUI failure and identify patients who need ICSI.

With stem cell therapy now available at our centre, we shall now bring hope to **AZOOSPEMIC** men who wish to father their own child.

We are the only centre in Delhi NCR who have reported successful pregnancies in Women with **THIN ENDOMETRIUM** through novel techniques of stem cell therapy and newer drugs.

LIFECARE ENDOSURGERY UNIT of Hospital provides State- of -ART Infertility enhancing Laparoscopic and Hysteroscopic surgery. Our centre is training centre for hysteroscopy for doctors by **Prof. Ossama Showki from Egypt .**

Lifecare IVF continues to occupy the Star Centre status for **TRAINING OF DOCTORS IN INFERTILITY, IVF - ISCI**, Embryology, Andrology and ultrasound.

This year we have trained doctors from all over India ... an unprecedented response. This speaks highly of the level of training and the dedication of the faculty. Hope we continue to remain on our top position.

We have account at slideshare.net & have 100 ppts on infertility & IVF , By this we reach out to even more remotest placed gynaecologists across India & other countries with the sole aim to be able to provide update knowledge & specialised infertility services to all Indian women even in remote areas.

Our inspiration is our Teacher and Mentor Dr. SHARDA JAIN who believes and puts into action " Knowledge and Skills are meant for sharing. The more you share, the more confident and capable you become in respective fields."

We the team of Lifecare IVF once again wish you all a Happy New year and promise to touch your lives with our care and treatment.
